

③

Stemming

```
import nltk
from nltk.stem import PorterStemmer
from nltk.corpus import stopwords
```

Paragraph = ""

Sentences = nltk.sent_tokenize(Paragraph)

stemmer = PorterStemmer()

stemming :

for i in range(len(Sentences)):

words = nltk.word_tokenize(Sentences[i])

words = [stemmer.stem(word) for word in words

if word not in set(stopwords.words('english'))]

Sentences[i] = ' '.join(words)

Problem:

Reduced intermediate representation of the word may not have any meaning.
